March 21, 2017

The S.C. Department of Employment and Workforce (DEW) has enhanced its powerful online job-matching website SCWorks.org with the comprehensive search engine SCWorks.jobs. SCWorks.jobs allows job seekers to look for work by high-demand industry using their individual job parameters and priorities.

DEW worked with nonprofit employer group DirectEmployers Association (DE) and the National Labor Exchange on SCWorks.jobs so the available jobs listed on the site are only from employers verified by SCWorks.org or DE's JobCentral.org. This new web tool will open more pathways for job seekers and employers to the state's leading job-matching website, SCWorks.org.

DEW also created new websites that align with the industry clusters identified by the S.C. Talent Pipeline initiative which identified high-growth, high-demand jobs in South Carolina. The industry specific sites include:

- SCWorks-Construction.jobs
- SCWorks-Healthcare.jobs
- SCWorks-IT.jobs
- SCWorks-Manufacturing.jobs
- SCWorks-Transportation.jobs
- SCWorks-Veterans.jobs

"These new websites put the jobs posted at SCWorks.org just a click or two away, making it easy for people to search for specific jobs. It also helps employers attract the right candidate for a job by giving them easy access to information about available positions," said DEW Executive Director Cheryl Stanton.

These new websites are easily viewable on smartphones and other mobile devices. In addition, they feature social media links, allowing users to quickly share job postings via Facebook, Twitter, email and more.

Additionally, the new SCWorks-veterans.jobs helps South Carolina's veterans translate their military experience into jobs in the civilian world. The Military Occupation Code Crosswalk function allows veterans to enter the type of work they performed in the armed services and receive a list of civilian jobs that require those skills. The system also translates military occupation codes into skills employers are looking for in potential employees.
